

MEET THE **FUTURE** OF **INTERCOM** COMMUNICATION

RTS VOICE OVER CLOUD (RVOC): SECURE. SCALABLE. BUILT FOR MISSION-CRITICAL COMMUNICATION.

RVOC offers scalability, security, and seamless integration, RVOC sets the new benchmark for intercom communication in mission-critical environments. With interoperability across RTS hardware and software, RVOC enables a smooth transition from legacy systems while preserving past investments.

Key Technical Highlights

- **Cloud-Powered by AWS:** Ensures seamless global connectivity and scalable operations.
- **Seamless Interoperability:** Works effortlessly with RTS KP-series keypanels, digital belt pack, digital speaker station and ODIN matrix via existing RTS RVON technology
- **Real-Time Synchronization:** Keeps teams connected regardless of location, ideal for live broadcasts and large-scale events
- **Scalable & Agile Port Support:** Adapts dynamically to growing communication needs
- **State-of-the-Art Security:** Utilizes WebRTC encryption and leading-edge codecs for secure, high-fidelity audio transmission.
- **Mobile Integration:** The RVOC Edge mobile app allows remote team members to connect securely, bridging the gap between control rooms and field operations

UNBREAKABLE CONNECTION. STAY LINKED, ANYWHERE.

RVOC keeps teams connected with seamless, secure, and scalable communication. Built for high-demand industries, it unifies intercom systems, mobile users, and back-office operations into one network. Powered by AWS with WebRTC encryption, RVOC ensures low-latency, high-fidelity conversations—anytime, anywhere.

SCAN TO EXPERIENCE RVOC NOW...

*"During its beta, **RVOC** revolutionized our operations—delivering seamless, crystal-clear communication and unmatched reliability for the 2025 Inauguration."*

— Director of Broadcast Operations,
Global Major Media Network

CLOUD-POWERED. ULTRA-SECURE. ENGINEERED FOR PERFORMANCE.

RVOC unites back-office operations, centralized intercom cores, and mobile connectivity into a single, intuitive platform. Designed for industries where precision, scalability, and security are essential, RVOC empowers teams to collaborate effortlessly, ensuring smooth operations in any environment.

A Unified Communication Ecosystem:

- RVOC Elevate: Streamlines workflows and integrates operations effortlessly.
- RVOC Engine: Delivers centralized communication for mission-critical environments.
- RVOC Edge: Empowers mobile teams with secure, real-time connectivity

KEEP **EVERYONE** CONNECTED...

With RVOC, teams stay connected, no matter where they are. Built for the demands of today and the challenges of tomorrow, it delivers seamless, secure, and scalable communication when it matters most.

- **Broadcast & Media:** Power live productions with seamless, real-time communication, ensuring uninterrupted coverage and instant coordination across teams.
- **Event Production:** Keep crews connected across multi-venue events, from concerts to conferences, enabling flawless execution and rapid decision-making.
- **Sports & Esports:** Deliver high-stakes game-day coordination with ultra-low latency communication between analysts, production crews, and field teams.
- **Corporate & Enterprise:** Support hybrid and remote teams with secure, scalable communication that enhances collaboration and operational efficiency.

NO GAPS, NO DELAYS—JUST INSTANT, RELIABLE COMMUNICATION WITH RVOC.
